Hilton Sno-Flyers News July 2010

Reports from NYSSA Annual Forum

In April, I attended the NYSSA Forum in Syracuse along with 6 other HSF board members. I attended the following seminars.

At the OPRHP seminar we learned that New York State didn't take a million dollars from the trail grant money. Also found out about the updates on Phase I,II, and III for the trail grant money. I also attended the Automated Work logs seminar to better understand the computer part of trail grant procedure. I also attended the Insurance and Liability seminars where we obtained information on what protection the club should be considering. Had great food with great club members and conversed with other clubs across the state.

Recommendations for summer storage of your sleds.
1. Clean sled of all mud and salt.
2. Grease fittings
3, /Raise track off the floor and ground and back off tension
4. Remove drive belt
5. Fog engine
6. Cover machine but not with plastic.

By Tom Francis VP

I recently went to the annual NYSSA meeting and went to several seminars.

One of the seminars was about Groomer maintenance, some of the things that were talked about was that the groomers should have spare fuel filters, ATF oil, oil, coolant, diesel 911 and a track repair kit on each machine we own. Some other things talked about was how we should raise and loosen the tracks on our groomers, paint all of the fuel bleeders, and if the club could spare the expense put a camera on the drag or on the back of the machine to be able to observe what is going on behind us when we are grooming it would help with operating the machine a little safer.

Another seminar I went to was trail signage. I learned a little more information than from the first trail signage class that the trail bosses and others went to at the Elks club awhile back. For me going to this meeting allowed me to get some more insight on how we as a club, operate and to continuously improve on how we go about running this club and to better the experience for everyone that rides our trail system.
